Table of Contents

1. Use-Cases Identification.....	3
2. UML Use-Case Diagrams.....	3

1. Use-Cases Identification

Use case : Log In

Level : user-goal level

Primary actor : regular user

Main success scenario :

- The user fills the input fields with valid data (username and password)
- After clicking the submit button, a “Success” message appears on the screen.

Extensions :

- Fail: If the username – password combination is incorrect, a prompt will appear telling the user that the username does not exist.

2. UML Use-Case Diagrams
